

Peer Feedback Summary — Derjen Frick

Strengths

Derjen was widely regarded as the primary technical driver of the project. His ****programming**** contributions were the most extensive within the team, encompassing the development environment setup, Microsoft registration integration, event logic, project creation functionality, package logic, and the overall development layout. This reflects exceptional ****problem-solving ability**** and strong technical expertise.

His ****investigative attitude**** was consistently noted: he actively researched technologies and approaches to meet client requirements, and shared his findings with the team. He provided technical guidance and explanations to teammates willingly, demonstrating both ****collaborative ability**** and strong ****communicative ability**** within the team setting.

During client meetings, Derjen was the most engaged team member, asking substantive questions and offering suggestions. He also conducted live demonstrations during team meetings and regularly checked in on colleagues, showing a strong sense of shared responsibility for project progress.

His work was delivered consistently on time and to a high standard, and he contributed to documentation through the API test section of the test results.

Areas for Improvement

- ****Professional conduct with the client****: Derjen struggled at times to maintain a sufficiently formal and professional tone during client meetings. Developing this aspect of his ****communicative ability**** in external settings is an important step in his professional growth.

- ****Focus during team meetings****: A tendency to go off-topic, deviate from the project scope, or engage in side discussions during meetings reduced their effectiveness. Maintaining focus and structure would improve the overall quality of team collaboration.
